Your sprint commitment has increased by 3 issues
Due to scope changes: You have 3 issues to complete this sprint

X-axis is time and y-axis is issue (task) count. Similar to last sprint, tasks were completed within the same 24 hours, and we managed to complete 3 features like we did in the previous sprint. Reason for this was the close relation between the 3 features as we could only have a return function if we had a proper interface for librarians. Furthermore, we needed checkout functionality before we could even develop a return feature.
